
M.2 to MINIPCIE adapter board

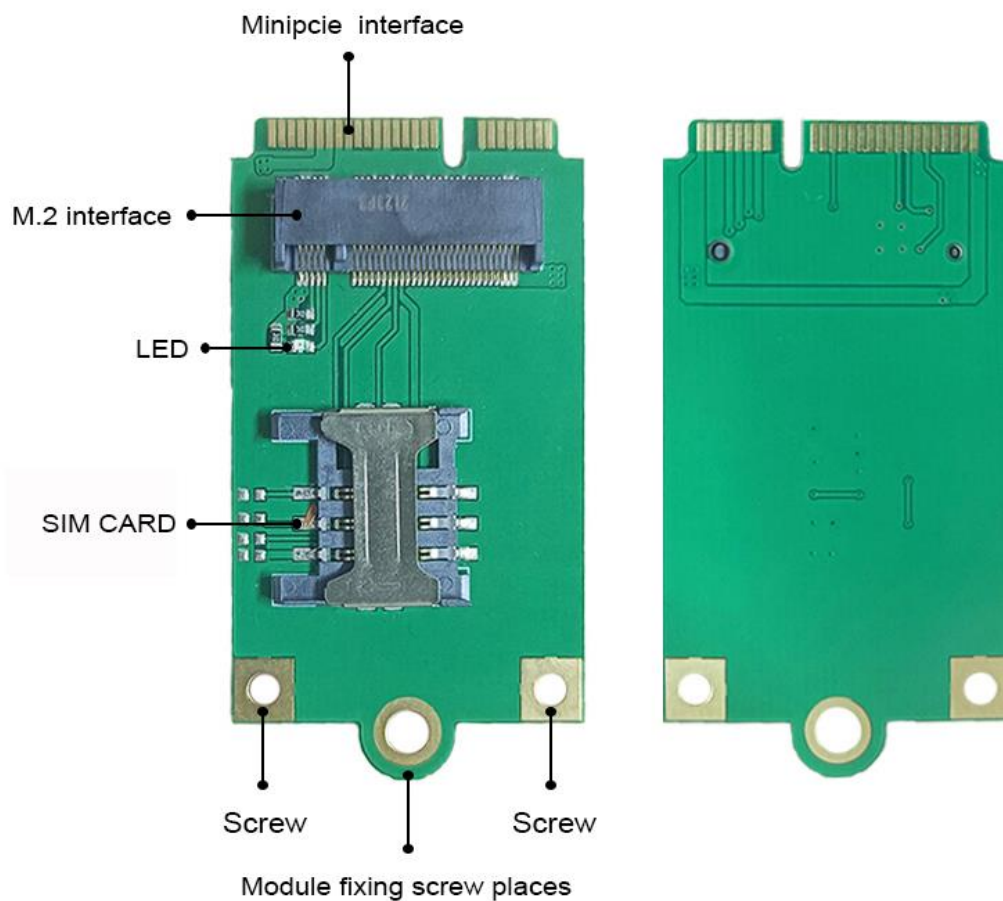

(Suitable for 42*30mm B-key Modules)

This product uses industry-grade materials and is an M.2 to MINIPCIE adapter card. It converts the M.2 (NGFF) module into a MINIPCIE interface. This product comes with a SIM card slot. The SIM card slot will not conflict with the SIM card slot on the motherboard. Customers can choose the card slot to use, and it is compatible with 42*30 mm NGFF (M.2) interface modules on the market.

Instructions for use:

1. There are two fixing screws at the end of the riser card, which can be fixed on the motherboard. The screw in the middle of the riser card is used to fix the module.
2. Industrial-grade SIM card holder is easy to use.
3. Size: 50mm*30mm*1.2mm

Installation guide:

1. Install the M.2 interface module
2. Install the antenna, SIM card. Then insert the module into the MINIPCIE card slot.
